The Mississippi State Department of Health (MSDH) is the state agency responsible for administering the Title V program in Mississippi. Maternal and Child Health (MCH) Block Grant funds are allocated in the MSDH central office to the Offices of Women's Health and Child/Adolescent Health. The Children's Medical Program (CMP) is the program of services for Children with Special Health Care Needs, and is located organizationally within Health Services (HS), which is responsible for all maternal and child health functions. These two HS Offices provide services for the three major populations targeted by the MCH Block Grant - pregnant women, mothers, and infants; children; and children with special health care needs. Health Services is also responsible for administering the statewide Family Planning program and the Women, Infants, and Children (WIC) Supplemental Food Program.

11. Statewide Initiatives and Partnerships

a. Direct Medical Care and Enabling Services
(max 2500 characters)

MSDH Newborn Screening Program – Mississippi has one of the most comprehensive newborn screening programs in the nation. State law requires that all babies born in Mississippi be tested for forty genetic disorders. Early detection of genetic disorders allows for treatment (direct medical care) to prevent permanent damage in the infant and the opportunity to lead a normal life. MSDH Children's Medical Program (CMP) – CMP is the state's Children with Special Health Care Needs (CSHCN) program and provides medical and surgical care to children with chronic or disabling conditions through the provision of equipment and drugs, and arrangement for physical, occupational and other therapies. The CMP collaborates with primary care physician groups to assure the availability of medical homes and uses public health district CSHCN coordinators to assist with care coordination at the local level (enabling services).

b. Population-Based Services
(max 2500 characters)

MSDH Immunization Program – The Immunization program provides all necessary immunizations at low cost and provides free vaccines for those eligible for the Vaccines for Children program, administered by MSDH. Mississippi law requires immunization in order to enter school, Head Start, and daycare. The program conducts annual immunization surveys to obtain statistical estimates of immunizations rates and established an Immunization Task Force comprised of Central Office and District staff to determine what activities should be conducted in the local health departments to increase immunization rates to meet the National Healthy People 2010 Goal for the 17% of children served by MSDH. MSDH Family Planning Program – The Adolescent Health Coordinator collaborates with internal and external partners to address teen pregnancy and adolescent sexual and reproductive health issues. The MSDH Office of Child and Adolescent Services Program works closely with the Division of Family Planning to implement strategies, policies and services that reduce the rate of repeat births to adolescent mothers less than 17 years old; to reduce the rate of adolescents at risk of early sexual initiation, teen pregnancy and teen parenthood; and to increase the rate of adolescents receiving comprehensive sexual health education in middle and high schools.

c. Infrastructure Building Services
(max 2500 characters)

The Office of Health Data and Research (OHDR) is housed within Health Services of the MSDH and provides data, analysis, research, surveillance, support, and management of assessment-related activities for Health Services with emphasis on maternal and child health (MCH). The OHDR is staffed by research biostatisticians, epidemiologists, program specialists, and other support staff who conduct surveillance programs and analyze data for the various Health Services programs and systems including Asthma, Pregnancy Risk Assessment Monitoring System (PRAMS), Tobacco, and the Youth Risk Behavior Surveillance System (YRBSS). The OHDR also compiles chronic disease reports and data profiles, and coordinates the Title V MCH Block Grant and the State Systems Development Initiative (SSDI).

Field Name: PM06

Year: 2011

Field Note:

2011:

For 2011-2014, indicator data come from the National Survey of Children with Special Health Care Needs (CSHCN), conducted by the U.S. Health Resources and Services Administration and the U.S. Centers for Disease Control and Prevention in 2009-2010. Compared to the 2001 CSHCN survey, there were revisions to the wording, order, and number of questions used to generate this indicator for the 2005-06 CSHCN survey. The questions were also revised extensively for the 2009-2010 CSHCN survey. Therefore, many parts of the three surveys are not comparable.

All estimates from the National Survey of CSHCN are subject to sampling variability, as well as survey design flaws, respondent classification and reporting errors, and data processing mistakes.

2010: Indicator data come from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Compared to the 2001 CSHCN survey, there were wording changes, skip pattern revisions, and additions to the questions used to generate the NPM06 indicator for the 2005-2006 CSHCN survey. There were also issues around the reliability of the 2001 data because of the sample size. The data for the two surveys are not comparable for PM #06 and the 2005-2006 may be considered baseline data.

Figures are reported from the National Oral Health Surveillance System (NOHSS). The NOHSS state oral health survey is conducted every five years; the most recent survey was performed during the 2009-2010 school year. Forty-five schools were selected from all public elementary schools with one or more students in third grade. Dental hygienists completed the screenings using diagnostic criteria comparable to ASTDD's 1999 Basic Screening Survey. Of the 3483 eligible students, 1928 were screened; for a response rate of 55%. Field Note:

2011: The current percentage shows a large increase for the performance measure. A review of WIC data revealed contract ITS analyses included duplicates that artificially inflated (even possibly doubled) the measure's denominator in past years. As a result, previous estimates were much lower than the actual prevalence. These errors have been corrected and a standard algorithm will be used for future reports.

LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE MS FY: 2013

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. To reduce the occurrence of very low birth weight deliveries and to reduce the occurrence of preterm or small-for gestational-age deliveries while increasing preconception care.
2. To reduce the rate of teen pregnancy among female adolescents aged 15-19 years.
3. To reduce adolescent and childhood overweight and obesity.
4. To reduce tobacco use among adolescents and to reduce adolescent use of alcohol and illegal drugs.

Column Name:

Year: 2011

Field Note:

2011: The denominator used to calculate this rate is adjusted from the actual 2010 statewide population estimate (210,678) of children below 5 years of age. The adjustment accounted for hospitals representing 94.6% of acute beds in MS. The estimated denominator is calculated on the percentage of hospitals in the state accounted for in the reported data. Hospitals reporting data used in this calculation accounts for 94.6% of all acute care hospital beds in Mississippi. Therefore, the population estimate for children under 5 years of age was adjusted by 94.6% (210,678*.94 = 199,301).

Column Name:

Year: 2010

Field Note:

The denominator used to calculate the rate is adjusted from the actual 2009 statewide population estimate (221400) of children below 5 years of age. The adjustment accounted for hospitals representing 94.6% of acute beds in MS. The estimated denominator is calculated on the percentage of hospitals in the state accounted for in the reported data. Hospitals reporting data used in this calculation account for 94.6% of all acute care hospital beds in Mississippi. Hence, the population estimate for children under 5 years of age was adjusted by 94.6% (221,400*.94 = 208116).

3. **Section Number:** Form17_Health Systems Capacity Indicator #01

Field Name: HSC01

Row Name:

Column Name:

Year: 2009

Field Note:

2009: The denominator used to calculate the rate for 2009 is adjusted by 2008 estimates for children below five years of age which was 7.5%. Thus, the denominator with an estimated population for 2009 for children below five years of age amounts to 221400. The projected number for the numerator is 512 based on historical data for the past three years. Therefore, we have a provisional annual indicator of 23.1 per 10,000 population in children below five years of age for year 2009.

HEALTH SYSTEMS CAPACITY #02

2009: Data provided to MSDH by State of Mississippi, Division of Medicaid (DOM) which in turn received the data from a private insurer contracted to administer Mississippi's CHIP program. While the percentage decrease is substantial from the previous year, this is the only information provided by the private insurer to DOM. This is the first year the private insurer has administered the CHIP program in Mississippi. The MSDH believes that the current arrangement for obtaining data from DOM results in underreporting for this indicator. MSDH will work to determine whether improved data is available by other means.

Also, the definition of "periodic screen" can differ between DOM and the private insurer which can result in an underreport for this indicator.

2011: No linked data file exists at this time. Data calculations are estimates based on a combination of sources which include Vital Statistics and Medicaid sources

There continues to be a need for data linkage with the Mississippi Division of Medicaid for the purpose of reporting accurate data in a timely manner and monitoring changes in the utilization of Medicaid services which impact the programs of the Mississippi State Department of Health. The State Systems Development Initiative (SSDI) grant is being used to promote data linkage between the two agencies.
