TOTAL	224,903					

FORM NOTES FOR FORM 7

Numbers on this form are very rough. New Mexico is unable to derive unduplicated numbers of pregnant women and children served by Title V. In 2008, New Mexico implemented the BEHR (Billing and Electronic Health Record) system. Children's Medical Services (CMS) is implementing a new case management software system "ChallengerSoft. (the same system used by the Families FIRST program). WIC data are being analyzed. Vital Records and Health Statistics converted to an electronic birth certificate system. All of these in combination should improve the precision in reporting the numbers for this form in the future. The remaining challenge is staffing shortages and continuing vacancy rates.

As of September, 2012, BEHR reporting capacity is still limited. CMS has not yet completed the transition to its new software system.

It is not yet possible to get accurate, updated, unduplicated numbers.

Previously, New Mexico only reported the number of direct service CSHCN clients of children's medical services, however, through policy work and infrastructure building, the CSHCN program reaches many more children. The number reported this year is a more accurate reflection of the reach of the Title V CSHCN programming.

Eligible for Title XIX	5,844	6,662	0	0	0	0	0	6,662

FORM NOTES FOR FORM 8

In Unduplicated Count by Race, "White" is Hispanic and Caucasian combined.

Source of delivery data: New Mexico Vital Records and Health Statistics (NMVRHS) via New Mexico Internet Based Information System (NM IBIS: <http://ibis.health.state.nm.us>)

NMVRHS does not record subcategories for Hispanic or Latino.

Source of number of infants in state: UNM BBER 2010 population estimates based on 2010 US Census data via NM IBIS

Source for title XIX eligibility data: Medicaid MCH Statistical Report for FFY 2010. Estimates are derived from this report.

All but a very small percent of deliveries are served by Title V through newborn screening.

At this time, it is not possible to get an exact count of how many infants in the state are served by Title V. Title V provides either infrastructure through salary support or funding for direct services for the following programs: newborn screening, immunization, high-risk prenatal care fund, families first, the family, infant, toddler program and the maternal and child health epidemiology program. Newborn Genetic Screening program is the most broad reaching and serves nearly all infants born in New Mexico.

FORM 10
TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2013
[Sec. 506(a)(1)]
STATE: NM

1. State MCH Administration:
(max 2500 characters)

Title V is located in the Family Health Bureau in the Public Health Division in the NM Department of Health. The Title V Director is also the Bureau Chief of the Family Health Bureau. The Family Health Bureau oversees: Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), Family Planning, Children with Special Health Care Needs, Perinatal Case Management/Home Visiting, Maternal Child Health, Maternal Child Health Epidemiology and Part C Care Coordination, School Health, Dental Health, Childhood Injury Prevention and Immunizations are located in other bureaus within the Public Health Division. Close coordination exists with these programs. The SECCS, Project LAUNCH and First Time Motherhood components are housed within the Maternal Child Health Section of the Bureau. The Family Health Bureau consists of sections/programs, and administrative staff who oversee the implementation of preventive services to reproductive aged women, mothers, infants, children, including children and youth with special health care needs, and their families. The programs assess the needs of this population, and generate data to influence policy decision making. The services provided range from: 1) Direct safety-net health care services to individuals; 2) Family support services such as transportation, parent to parent support, case management, care coordination, WIC Commodity Supplemental Foods and Farmer's Market, outreach, translation, and health education; 3) Population-based services, such as newborn screening, surveillance, SIDS education and counseling, injury and violence prevention activities, and a marketing campaign to increase positive birth outcomes; and 4) Capacity or infrastructure building services, such as needs assessment, evaluation, planning, policy development, quality assurance, monitoring, training, information systems, and helping in developing systems of care. Several programs fund positions in the Region and Local Health Offices to implement these services. The Bureau houses a Medical Director, Bureau Chief, and support staff who work collaboratively to use resources strategically to meet identified needs.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ 4,359,436
3. Unobligated balance (Line 2, Form 2)	\$ 0
4. State Funds (Line 3, Form 2)	\$ 3,579,742
5. Local MCH Funds (Line 4, Form 2)	\$ 0
6. Other Funds (Line 5, Form 2)	\$ 6,523,648
7. Program Income (Line 6, Form 2)	\$ 3,200,400
8. Total Federal-State Partnership (Line 8, Form 2)	\$ 17,663,226

9. Most significant providers receiving MCH funds

<u>University of New Mexico Hospitals</u>
<u>New Mexico Medical Insurance Pool</u>

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	15,360
b. Infants < 1 year old	25,600
c. Children 1 to 22 years old	71,263
d. CSHCN	79,908
e. Others	32,752

11. Statewide Initiatives and Partnerships

a. Direct Medical Care and Enabling Services
(max 2500 characters)

CYSHCN Enabling Services: 130 pediatric multidisciplinary specialty outreach clinics are provided around the state to enable CYSHCN to receive consultations with pediatric specialists in their own county or region. Family centered, community based Care Coordination services are provided for CYSHCN by 40 CMS social workers. The social workers also facilitate the development of community based systems of services for such children and their families. The NM Title V CYSHCN program is fortunate in that the provider base serves New Mexico's small population in a geographically large state. Providers and agencies are represented by key players throughout the state, many of whom share the MCH approach to care for CYSHCN. The Title V Program works with Parents Reaching Out, EPICS and Family Voices to assure critical family involvement in decision making and training of providers and families, collaboration regarding transition of CYSHCN, cultural competence issues and ongoing efforts in the state to create a medical home climate. The National Center for Cultural Competence assisted districts in planning for district appropriate cultural competence activities. The districts continue this work. With limited funding and increasing costs, the Children's Medical Services (CMS) is now billing for care coordination (case management) for Medicaid clients receiving clinic services. CMS will negotiate with the MCO's to increase the breadth of funding to include more than a 2 hour billing per child.

b. Population-Based Services
(max 2500 characters)

Newborn Hearing and Genetic Screening Programs screen approximately 29,000 children annually. Genetic screening is performed at Oregon State Public Health Laboratory, and the OSPHL pediatric specialists act as consultants to the NB Genetic Screening Program, NM primary care physicians, and families. Experts from families, professions, agencies and UNM participate in the Newborn Hearing Advisory Committee and the Newborn Genetic Advisory Committees which meet quarterly, thus assuring a statewide effort to provide family-centered, culturally competent, community based, coordinated screening, follow-up and care. The NB Genetic Screening follow-up nurse works closely with professional staff from UNM including metabolic and genetic specialist, pulmonologists, nutritionists and others to coordinate follow up for infants with conditions identified on the newborn screen, or those who need further testing to determine if they are affected. The Title V CYSHCN Program (CMS) works closely with UNM Continuum of Care, the Lend Program, Parents Reaching Out, Family Voices, the Health Systems Bureau, RPHCA funded clinics, 1000 providers, the NM Pediatric Society, the NM Medical Society, the Medicaid/SCHIP Programs, Indian Health Services, Long Term Services and the Family Infant Toddler Program.

c. Infrastructure Building Services
(max 2500 characters)

CMS provides surveillance to the state on children with special health care needs. Work continues with these partners on the Family Infant Toddler Interagency Coordinating Council, the MCH Collaborative and the Health Transition Council to meet the MCH model and to increase the participation of key players in addressing MCH initiatives. University operated perinatal outreach clinics are located in Albuquerque, Las Cruces, Alamogordo, Farmington, Taos, and Roswell. These clinics are staffed by University Maternal-Fetal Medicine sub-specialists (perinatologists). They provide ongoing local patient care and physician consultation. The maternal transport and obstetric referral system provides access to a Maternal-Fetal Medicine sub-specialist 24/7 for telephone consultations. They provide transport of patients requiring intensive management at the University. The University also provides sub-specialist physicians, diabetes educators and clinical nurse educators who travel the state to provide training programs that help to maintain a uniform and ever improving standard of obstetrical care for New Mexicans. High-risk obstetrical programs and case presentations are presented at community hospitals, in which all health care professionals interested in maternal child health may attend.

Field Level Notes

1. **Section Number:** Form11_Performance Measure #4

Field Name: PM04

Row Name:

Column Name:

Year: 2011

Field Note:

For 2011-2014, indicator data come from the National Survey of Children with Special Health Care Needs (CSHCN), conducted by the U.S. Health Resources and Services Administration and the U.S. Centers for Disease Control and Prevention in 2009-2010. This survey was first conducted in 2001. The same questions were used to generate the NPM 4 indicator for the 2001, 2005-06, and 2009-2010 CSHCN surveys.

All estimates from the National Survey of CSHCN are subject to sampling variability, as well as survey design flaws, respondent classification and reporting errors, and data processing mistakes.

2. **Section Number:** Form11_Performance Measure #4

Field Name: PM04

Row Name:

Column Name:

Year: 2010

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Data results from the 2009-2010 survey will be released in Fall of 2011.

3. **Section Number:** Form11_Performance Measure #4

Field Name: PM04

Row Name:

Column Name:

Year: 2009

Field Note:

Please see notes from 2006 and 2007.

PERFORMANCE MEASURE # 05

Percent of children with special health care needs age 0 to 18 whose families report the community-based service systems are organized so they can use them easily. (CSHCN Survey)

	<u>Annual Objective and Performance Data</u>				
	2007	2008	2009	2010	2011
Annual Performance Objective	70	89	90	90	90

Field Level Notes

1. **Section Number:** Form11_Performance Measure #5

Field Name: PM05

Row Name:

Column Name:

Year: 2011

Field Note:

For 2011-2014, indicator data come from the National Survey of Children with Special Health Care Needs (CSHCN), conducted by the U.S. Health Resources and Services Administration and the U.S. Centers for Disease Control and Prevention in 2009-2010. Compared to the 2001 CSHCN survey, there were revisions to the wording, order, and number of questions used to generate this indicator for the 2005-06 CSHCN survey. The questions were also revised extensively for the 2009-2010 CSHCN survey. Therefore, none of the three rounds of the surveys are comparable.

All estimates from the National Survey of CSHCN are subject to sampling variability, as well as survey design flaws, respondent classification and reporting errors, and data processing mistakes.

2. **Section Number:** Form11_Performance Measure #5

Field Name: PM05

Row Name:

Column Name:

Year: 2010

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Data results from the 2009-2010 survey will be released in Fall of 2011.

Compared to the 2001 CSHCN survey, there were wording changes, skip pattern revisions, and additions to the questions used to generate the NPM06 indicator for the 2005-2006 CSHCN survey. There were also issues around the reliability of the 2001 data because of the sample size. The data for the two surveys are not comparable for PM #05 and the 2005-2006 may be considered baseline data.

3. **Section Number:** Form11_Performance Measure #5

Field Name: PM05

Row Name:

Field Level Notes

1. Section Number: Form11_Performance Measure #7

Field Name: PM07

Row Name:

Column Name:

Year: 2011

Field Note:

The interpretation of the NIS tables has become more complicated in recent years with the measurement of Hib full series (FS) vs partial series (PS) and the fact that CDC now takes into account brand type of Hib. Rates between years may not be comparable.

2010 and 2011 measure the 4:3:1:3:3:1PS.

2009 measures 4:3:1:3:3:1

Using the 4:3:1:3:3:1 measure:

2007 = 76

2008 = 77

2009 = 68.2

2010 = 70.9.

4:3:1:3:3:1 is not available for 2011.

1. **Section Number:** Form11_Performance Measure #15
Field Name: PM15
Row Name:
Column Name:
Year: 2011
Field Note:
 2011 Data not yet available.

2. **Section Number:** Form11_Performance Measure #15
Field Name: PM15
Row Name:
Column Name:
Year: 2010
Field Note:
 Unweighted data.

PERFORMANCE MEASURE # 16

The rate (per 100,000) of suicide deaths among youths aged 15 through 19.

	<u>Annual Objective and Performance Data</u>				
	2007	2008	2009	2010	2011
Annual Performance Objective	13.5	21	16	13	14
Annual Indicator	18.5	19.5	15.2	18.0	16.9
Numerator	31	33	26	27	25
Denominator	167,360	169,498	170,939	149,978	147,705
Data Source		NMVRHS	NMVRHS	NMVRHS	NMVRHS

Check this box if you cannot report the numerator because

- 1. There are fewer than 5 events over the last year, and
- 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.
(*Explain data in a year note. See Guidance, Appendix IX.*)

Year: 2011
Field Note:
 Denominator is not equal to total births in NM. It represents only resident births and eliminates births for which prenatal care status is unknown.
- Section Number:** Form11_Performance Measure #18
Field Name: PM18
Row Name:
Column Name:
Year: 2010
Field Note:
 Denominator is not equal to total births in NM. It represents only resident births and eliminates births for which prenatal care status is unknown.
- Section Number:** Form11_Performance Measure #18
Field Name: PM18
Row Name:
Column Name:
Year: 2009
Field Note:
 New Mexico changed to an electronic birth certificate system in 2007. It is not possible to compare data from before and after that year. It was discovered that many of the electronic birth certificates are missing data on month of prenatal care initiation. New Mexico VRHS is working to address this issue.

 Denominator is not equal to total births in NM. It represents only resident births and eliminates births for which prenatal care status is unknown.

FORM 11
TRACKING PERFORMANCE MEASURES
[SECS 485 (2)(2)(B)(ii) AND 486 (A)(2)(A)(ii)]
STATE: NM

Form Level Notes for Form 11

None

STATE PERFORMANCE MEASURE # 1 - REPORTING YEAR

The percent of women with a live birth who had no health care coverage for prenatal care.

Field Level Notes

1. Section Number: Form12_Outcome Measure 2

Field Name: OM02

Row Name:

Column Name:

Year: 2011

Field Note:

The infant mortality rate for African American infants should be interpreted with caution due to low numbers.

American Indian/Alaska Native: 6.8, CILL=4.1, CIUL=9.4

Asian or Pacific Islander: 8.4, CILL=1.1, CIUL=15.7

Black or African American: 17.2, CILL=6.6, CIUL=27.8

Hispanic: 5.3, CILL=4.1, CIUL=6.5

White, Non-Hispanic: 3.4, CILL=2.1, CIUL=4.7

2. Section Number: Form12_Outcome Measure 2

Field Name: OM02

Row Name:

Column Name:

Year: 2010

Field Note:

"White" is "White, non-Hispanic and Hispanic"

Note that due to low numbers of Black infant deaths, this rate may be statistically unreliable. In 2010, there were 6 deaths to Black infants.

3. Section Number: Form12_Outcome Measure 2

Field Name: OM02

Row Name:

Column Name:

Year: 2009

Field Note:

"White" is "White, non-Hispanic and Hispanic"

Note that due to low numbers of Black infant deaths, this rate may be statistically unreliable. In 2009, there were 9 deaths to Black infants.

OUTCOME MEASURE # 03

The neonatal mortality rate per 1,000 live births.

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE NM FY: 2013

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Improve access to and use of health and health related services including health insurance and other coverage such as Medicaid, S-SHIP for all MCH population groups.
2. Improve the transition from childhood ages to young adulthood for children and youth with special health care needs to assure uninterrupted access to health care and related transition services.
3. Improve indicators of health in the preconception and perinatal periods, including but not limited to smoking, alcohol, folic acid use, family violence, intention of pregnancy, access to and use of health care, and maternal depression.
4. Reduce indicators of violence affecting the MCH population with focus on reducing the number of children witnessing violence, the rate of substantiated child abuse and on reducing the percent of women who report physical abuse before and during pregnancy.
5. Reduce unintended births to teens, and the related prevalence of sexually transmitted infections among teens.
6. Promote healthy weight and physical fitness among parents and their children; reduce overweight and obesity in the MCH population with focus on early childhood and adolescents to reduce psychological and chronic disease problems.
7. Reduce rates of fatal and non-fatal unintentional injury among children and teens, with emphasis on interventions to prevent motor vehicle crash and household accident injuries.
8. Promote positive youth development experiences with emphasis on building personal and social assets at the family, school and community levels, and with a view to reduce the proportion of youth who engage in risk behaviors that have serious life-long consequences.
9. Strengthen the role of males in MCH through promotion of effective initiatives in healthy fatherhood and in reproductive health through male involvement strategies.
10. Monitor the health of immigrants in the MCH population.

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: NM

SP() # _____ 1

PERFORMANCE MEASURE:

The percent of women with a live birth who had no health care coverage for prenatal care.

STATUS:

Active

GOAL:

Increase health care coverage for prenatal care.

DEFINITION:

Coverage for prenatal care is health care coverage for the regular care women should receive from a qualified prenatal care provider such as a midwife, physician, or other clinical practitioner.

Numerator:

Number of mothers responding to the PRAMS survey who answered "I don't have health insurance" to question 62, "During your most recent pregnancy, what was the name of your health insurance?" (2008 survey) and "I did not have health insurance to help pay for my prenatal care" (2009 survey onward).

Denominator:

Number of NM mothers that completed the PRAMS survey.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE:

Increase the proportion of pregnant women who receive early and adequate prenatal care.

DATA SOURCES AND DATA ISSUES:

NM PRAMS Survey

SIGNIFICANCE:

Too many women lack health care coverage, which often results in their seeking care late or not at all.

SP() # 2

PERFORMANCE MEASURE:

The percent of pregnant women and new mothers receiving support services through community home visiting programs

STATUS:

Active

GOAL

Increase support for pregnant women and new mothers through home visits by nurses, social workers, or other health care workers

DEFINITION

The number of New Mexico mothers who respond to the PRAMS survey who report having been visited at home by a nurse, social worker, or other health care worker during pregnancy and/or after delivery.

Numerator:

the Unduplicated number of new NM mothers who selected answer "e" on question #64 in the NM PRAMS survey, "During your most recent pregnancy, did you participate in any of these services?...Home visiting services by a nurse, social worker, or other health care worker," and answer "e" on question #65, "Since your new baby was born, have you participated in any of these services?...Home visiting services by a nurse, social worker, or other health care worker."

Denominator:

Number of NM mothers that completed the PRAMS survey.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE

NA

DATA SOURCES AND DATA ISSUES

NM PRAMS Survey.

SIGNIFICANCE

Home visit follow-up after a 24-hour discharge can save about \$500 in net costs per infant (Brumfield, 1996). Comprehensive home visiting programs can improve the home environment or parenting (Kendrick, 2008) or breastfeeding practices (Morrow, 1999). Some evaluations show benefits such as deferral of subsequent pregnancies, (Kitzman, 1997) increased maternal employment and prevention of child abuse (Olds, 1999) or decreased duration of welfare use. (Kitzman, 2000). For low-income families, the cost of home visiting is recovered by reducing overall government spending by \$180 per family (Olds, 1993).

SP() # 3

PERFORMANCE MEASURE:

The percent of births resulting from pregnancies that were unintended.

STATUS:

Active

GOAL

To improve maternal and infant health by reducing unintended pregnancy in New Mexico to less than 30% of live births.

DEFINITION

Unintended pregnancies are those that a mother reported as not wanted or wanted later; Intended pregnancies are those a mother reported as wanted then or sooner.

Numerator:

Number of mistimed and unwanted births from NM PRAMS

Denominator:

Number of NM Resident Births

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE

Increase the proportion of pregnancies that are intended

DATA SOURCES AND DATA ISSUES

NM PRAMS: 1997 is our first year of data; data will be ready for analysis in November 1998. Vital records for 1997 closed in July 1998; data are weighted by CDC PRAMS, accounting for factors in the sample frame, response rates per stratum, and response rate per question. Henceforth, data for each year will be produced the winter of the following year, 1998 data in November 1999 and so on.

SIGNIFICANCE

Unintended pregnancy is associated with demographic characteristics of teen ages, single women/men, lower education and income levels in women and men; maternal health problems of poor access to family planning services, late prenatal care, smoking, family violence and other family stressors; infant outcomes of low birth weight, late or no infant health care including immunizations.

SP() # _____ 4

PERFORMANCE MEASURE:

The percent of women initiating prenatal care after 10 weeks that did not get care as early as they wanted

STATUS:

Active

GOAL

Increase the number of women receiving prenatal care early in pregnancy.

DEFINITION

Coverage for prenatal care is health care coverage for the regular care women should receive from a qualified prenatal care provider such as a midwife, physician, or other clinical practitioner.

Numerator:

Number of mothers responding to the PRAMS survey who answered 10 weeks or more to question 15, "How many weeks or months pregnant were you when you had your first visit for prenatal care?" and "No" to question number 16, "Did you get prenatal care as early in your pregnancy as you wanted?"

Denominator:

Number of NM mothers that completed the PRAMS survey.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE

Increase the proportion of pregnant women who receive early and adequate prenatal care.

DATA SOURCES AND DATA ISSUES

NM PRAMS Survey.

SIGNIFICANCE

Timely and adequate prenatal care permits evaluation of medical and psychosocial risks, treatment of problems and referral for support services. It also gives families a chance to discuss maternal and infant health. Use of prenatal care is associated with decreased rates of preterm birth, (Vintzileos, 2002 & 2003), fetal death (Vintzileos, 2002), and low birth weight (Herbst, 2003). Preterm labor and low birth weight are costly: a recent study estimated that total expenditures for preterm-labor hospitalization for the United States were in excess of \$820 million. (Nicholson, 2000). Reducing publicly funded prenatal care could increase low birth weight, prematurity and postnatal expenses. In a recent study of undocumented immigrants, every dollar cut would increase the cost of postnatal care by \$3.33 and incremental long-term costs by \$4.63. (Lu, 2000).

SP() # _____ 6

PERFORMANCE MEASURE:

The percent of middle school students that report using alcohol within the past 30 days.

STATUS:

Active

GOAL

Prevent health consequences of early initiation of alcohol use.

DEFINITION

Respondent reports having consumed alcohol on at least one of the past 30 days.

Numerator:

Number of middle school Youth Risk and Resiliency Survey (YRRS) respondents who report consuming alcohol in the past 30 days.

Denominator:

Number of middle school respondents to the question about past 30 day alcohol use in the New Mexico Youth Risk and Resiliency Survey

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE

Increase the age and proportion of adolescents who remain alcohol and drug free

DATA SOURCES AND DATA ISSUES

Source is the New Mexico Youth Risk and Resiliency Survey (YRRS). Data are weighted for probability of selection and population parameters at the school district level.

SIGNIFICANCE

Approximately 11 million American youth under the age of 21 drink alcohol. Nearly half of them drink to excess, consuming five or more drinks in a row, one or more times in a two week period. Boys usually try alcohol for the first time at just 11 years old, while the average age for American girls' first drink is at age 13. Underage drinking is a factor in nearly half of all teen automobile crashes, and contributes to youth suicide, homicide and injury, and is linked to sexual assault and date rape.

SP() # _____ 7

PERFORMANCE MEASURE:

The proportion of women who report being physically abused by husband or partner during pregnancy.

STATUS:

Active

GOAL

To improve the health and well being mothers and to reduce family violence and the risk of children being exposed to family violence.

DEFINITION

Rate: Weighted percent of women who report physical abuse by partner in pregnancy from PRAMS surveillance

Numerator:

Numerator: Number women abused is an estimate derived from PRAMS surveillance

Denominator:

Denominator Population of live births, estimate derived from PRAMS surveillance

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE

See related HP 2010 objectives

No specific Healthy People 2010 Objective for this age group and gender. Related Objective: 15-34: Reduce the rate of physical assault by current or former intimate partners. Target 3.3 physical assaults per 1,000 persons age 12 and older. Baseline was 4.4 in 1998. Disparities reported : rate for females was 7.2 per 1,000 females; males 1.3 per 1,000 males

DATA SOURCES AND DATA ISSUES

This data is collected by the Pregnancy Risk Assessment Monitoring System, it is a core question for all PRAMS states. There may be under-reporting due to the nature of the question.

SIGNIFICANCE

Prenatal physical abuse of mothers can result in fetal death, early labor, preterm, low birthweight or maternal medical problems. It is associated with severe emotional distress and threatens healthy family life. Children who are exposed to domestic violence are at increased risk for behavioral difficulties, emotional problems, poor academic performance, delinquency and impaired health during adulthood

SP() # _____ 8

PERFORMANCE MEASURE:

The proportion of women who exclusively breastfeed their babies through six months.

STATUS:

Active

GOAL

To increase to 25% the percent of mothers report exclusively breastfeeding their infants at six months of age.

DEFINITION

Exclusive breastfeeding is defined as ONLY breast milk—NO solids, no water, and no other liquids.

Numerator:

Mothers with infants born in survey cohort that participate in the National Immunization Survey, who report they they exclusively breastfed their infants through six months of age.

Denominator:

Mothers with infants born in survey cohort that participate in the National Immunization Survey.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE

Increase the proportion of infants that are exclusively breastfed through six months to 25.5%

The HP 2020 objective can be found here: <http://www.healthypeople.gov/2020/topicsobjectives2020/objectiveslist.aspx?topicid=26>

DATA SOURCES AND DATA ISSUES

Centers for Disease Control and Prevention National Immunization Survey

SIGNIFICANCE

Breast milk is widely acknowledged to be the most complete form of nutrition for infants, with a range of benefits for infants' health, growth, immunity, and development. The benefits of exclusive breastfeeding include decreased new cases or severity of diarrhea, respiratory infections, and ear infections, others, and reduced cost to the family. In addition, breastfeeding has been shown to improve maternal health, with demonstrated effects, including reduction in postpartum bleeding, earlier return to prepregnancy weight, reduced risk of premenopausal breast cancer, and reduced risk of osteoporosis, continuing long after the postpartum period.

Field Name: HSC07A
Row Name:
Column Name:
Year: 2009
Field Note:
Denominator: 52% of children, ages 1-20 in 2009 (591,860). Number of children is estimated by Bureau of Business and Economic Research; BBER does not provide projections for individual ages past 20. 52% is the estimated percentage of children living at or below 200% FPL.

Numerator: Source: NM Medicaid Office. Data from October 1, 2008- September 30, 2009.

Note on BBER data: Beginning with the population estimates for 2007, the University of New Mexico Bureau of Business and Economic Research (BBER) updated its estimates of age-specific migration with new data. This change caused a break in continuity between the 2006 and 2007 estimates. Older age groups were affected more than others. For rates calculated from BBER population estimates, any rate differences from 2006 to 2007 must be interpreted with caution, as they may be partly attributable to the change in population estimates used in the rate denominators.

HEALTH SYSTEMS CAPACITY #07B

The percent of EPSDT eligible children aged 6 through 9 years who have received any dental services during the year.

Annual Indicator Data

	2007	2008	2009	2010	2011

INDICATOR #05 Comparison of health system capacity indicators for Medicaid, non-Medicaid, and all MCH populations in the State	YEAR	DATA SOURCE	POPULATION		
			MEDICAID	NON-MEDICAID	ALL
a) Percent of low birth weight (< 2,500 grams)	2011	Payment source from birth certificate	8.1	7.1	8.8
b) Infant deaths per 1,000 live births	2011	Payment source from birth certificate	5.9	5	5.2
c) Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester	2011	Payment source from birth certificate	62.6	73.5	68.4
d) Percent of pregnant women with adequate prenatal care (observed to expected prenatal visits is greater than or equal to 80% [Kotelchuck Index])	2011	Payment source from birth certificate	68	74.1	68.9

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #06 (MEDICAID ELIGIBILITY LEVEL)
 STATE: NM

INDICATOR #06 <i>The percent of poverty level for eligibility in the State's Medicaid programs for infants (0 to 1), children, Medicaid and pregnant women.</i>	YEAR	PERCENT OF POVERTY LEVEL MEDICAID (Valid range: 100-300 percent)
a) <i>Infants (0 to 1)</i>	2011	_____185_____
b) <i>Medicaid Children</i> (Age range _____1 to _____19) (Age range _____ to _____) (Age range _____ to _____)	2011	_____185_____
c) <i>Pregnant Women</i>	2011	_____185_____

FORM NOTES FOR FORM 18

None

FIELD LEVEL NOTES

1. **Section Number:** Form18_Indicator 06 - SCHIP
Field Name: SCHIP_Women
Row Name: Pregnant Women
Column Name:
Year: 2013
Field Note:
Pregnant women do not receive SCHIP in New Mexico.
2. **Section Number:** Form18_Indicator 05
Field Name: CareFirstTrimester
Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester
Column Name:
Year: 2013
Field Note:
This indicator uses PRAMS, and NPM 18 uses Vital Records. Vital Records files are missing a high percentage of payer of care and prenatal care status, therefore PRAMS is currently the best source for prenatal care by payer of delivery.
3. **Section Number:** Form18_Indicator 05
Field Name: AdequateCare
Row Name: Percent of pregnant women with adequate prenatal care
Column Name:
Year: 2013
Field Note:
NM Vital Records no longer calculates the Kotelchuck index. Kotelchuck by payer of care from 2010 PRAMS data.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
 STATE: NM

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	2	No
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	1	No
Annual linkage of birth certificates and WIC eligibility files	1	No
Annual linkage of birth certificates and newborn screening files	2	No
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	3	No
Annual birth defects surveillance system	2	No
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

*Where:
 1 = No, the MCH agency does not have this ability.
 2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
 3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
 STATE: NM

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	No
Other: _____		

*Where:
 1 = No
 2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
 3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Notes:

1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

FORM NOTES FOR FORM 19

None

FIELD LEVEL NOTES

None

FORM 20
 HEALTH STATUS INDICATORS #01-#05
MULTI-YEAR DATA
 STATE: NM

Form Level Notes for Form 20

None

HEALTH STATUS INDICATOR #01A

The percent of live births weighing less than 2,500 grams.

	<u>Annual Indicator Data</u>				
	2007	2008	2009	2010	2011
Annual Indicator	8.7	8.4	8.3	8.7	8.8
Numerator	2,722	2,546	2,395	2,420	2,386
Denominator	31,174	30,156	28,873	27,795	27,251

Check this box if you cannot report the numerator because

1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.
- (Explain data in a year note. See Guidance, Appendix IX.)*

FORM NOTES FOR FORM 21

None

FIELD LEVEL NOTES

1. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_SingleParentPercent
Row Name: Percent in household headed by single parent
Column Name:
Year: 2013
Field Note:
percent by race and ethnicity not available at this time.
2. **Section Number:** Form21_Indicator 11
Field Name: S11_50percent
Row Name: Percent Below: 50% of poverty
Column Name:
Year: 2013
Field Note:
The percent of New Mexicans below 50% of poverty is unknown.
3. **Section Number:** Form21_Indicator 12
Field Name: S12_50percent
Row Name: Percent Below: 50% of poverty
Column Name:
Year: 2013
Field Note:
Data are for children ages 0 through 17.
The percent of New Mexico children below 50% of poverty is unknown.
