FORM 2
MCH BUDGET DETAILS FOR FY 2013
[Secs. 504 (d) and 505(a)(3)(4)]
STATE: WI

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])

\$ 10,658,234

Of the Federal Allocation (1 above), the amount earmarked for:

A. Preventive and primary care for children:

\$ 3,447,944 (32.35 %)

B. Children with special health care needs:

\$ 3,427,970 (32.16 %)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C. Title V administrative costs:

\$ 670,159 (6.29 %)

(The above figure cannot be more than 10%)[Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 0

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 9,657,814

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 0

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 9,375,410

7. TOTAL STATE MATCH (Lines 3 through 6)

\$ 19,033,224

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 4,721,800

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

\$ 29,691,458

(Total lines 1 through 6. Same as line 15g of SF 424)

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS:	\$	<u>0</u>
b. SSDI:	\$	<u>100,000</u>
c. CISS:	\$	<u>0</u>
d. Abstinence Education:	\$	<u>0</u>
e. Healthy Start:	\$	<u>0</u>
f. EMSC:	\$	<u>130,000</u>
g. WIC:	\$	<u>92,904,499</u>
h. AIDS:	\$	<u>2,574,464</u>
i. CDC:	\$	<u>50,947,686</u>
j. Education:	\$	<u>0</u>
k. Home Visiting:	\$	<u>945,567</u>
l. Other:		

Lead Tobacco, ECCS	\$	<u>1,044,013</u>
Project Launch/SAMSA	\$	<u>850,000</u>

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 149,496,219

11. STATE MCH BUDGET TOTAL

\$ 179,187,677

(Partnership subtotal + Other Federal MCH Funds subtotal)

FIELD LEVEL NOTES

1. **Section Number:** Form3_Main

Field Name: ProgramIncomeExpended

Row Name: Program Income

Column Name: Expended

Year: 2011

Field Note:

Program Income

Local reproductive health projects reported approximately \$1.7 million more than budgeted in Program Income (\$7,669,622 budgeted vs. \$9,375,410 reported). These agencies charge clients on the basis of a sliding fee scale. This increase reflects the ongoing, rising costs of services and supplies, as well as a greater percent of patients enrolled in Medicaid under which eligibility has increased. This increase in Program Income is the underlying cause of several of the variances associated with Forms 4 and 5, as indicated below.

2. **Section Number:** Form3_Main

Field Name: ProgramIncomeExpended

Row Name: Program Income

Column Name: Expended

Year: 2010

Field Note:

Local reproductive health projects reported approximately \$3 million more than budgeted in Program Income (\$7,510,211 vs. \$10,514,741). These agencies charge clients on the basis of a sliding fee scale. This increase reflects the ongoing, rising costs of services and supplies, as well as a greater percent of patients enrolled in Medicaid under which eligibility has increased. This increase in Program Income is the underlying cause of variances associated with Forms 4 and 5, as indicated below.

3. **Section Number:** Form3_Main

Field Name: OtherFedFundsExpended

Row Name: Other Federal Funds

Column Name: Expended

Year: 2010

Field Note:

This variance of approximately \$16 million is due to a \$13.5 million increase in immunization funds and \$3.4 million in new Nutrition/Physical Activity funds.

FORM NOTES FOR FORM 4

Significant decrease in CYSHCN 2013 vs 2011 — About 90% of the decrease in the CYSHCN dollars on Form 4 is due to a decrease in the MOE component of the Federal-State Partnership. The substantial decrease in MOE is due almost entirely to the elimination of Congenital Disorders (program revenue) dollars from MOE count.

FIELD LEVEL NOTES

- 1. Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
Field Name: PregWomenExpended
Row Name: Pregnant Women
Column Name: Expended
Year: 2011
Field Note:
Pregnant
This variance, a decrease of \$1,012,976 (32.8%) is due primarily to a \$666,000 decrease in related Program Income, a \$260,000 decrease in related Maintenance of Effort expenditures, and a \$170,000 decrease in related Title V Local Aids expenditures.
- 2. Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
Field Name: Children_0_1Expended
Row Name: Infants <1 year old
Column Name: Expended
Year: 2011
Field Note:
Infant
This variance, an increase of \$519,982 (24.7%) is due primarily to a \$393,000 increase in Match and a \$102,000 increase in related Title V Local Aids expenditures.
- 3. Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
Field Name: Children_1_22Expended
Row Name: Children 1 to 22 years old
Column Name: Expended
Year: 2011
Field Note:
Children
This variance, an increase of \$1,393,043 (15.9%) is due primarily to a \$994,000 increase in Program Income and a \$519,000 increase in Match. State Operations and MOE expenditures decrease slightly.
- 4. Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
Field Name: Children_1_22Expended
Row Name: Children 1 to 22 years old
Column Name: Expended
Year: 2010
Field Note:
This variance, an increase of \$1,230,866 (12.7%), is due primarily to an \$814,000 increase in Program Income and a \$374,000 increase in Match.
- 5. Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
Field Name: AllOthersExpended
Row Name: All Others
Column Name: Expended
Year: 2011
Field Note:
Other
This variance, an increase of \$1,821,598 (29.6%), is due primarily to a \$1.36 million increase in Program Income. In addition, increases of \$158,000 in Title V State Operations and \$289,000 in Title V Local Aids expenditures contributed to this variance.
- 6. Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
Field Name: AllOthersExpended
Row Name: All Others
Column Name: Expended
Year: 2010
Field Note:
This variance, an increase of \$2,664,990 (44.88%), is due primarily to a \$1.94 million increase in Program Income. In addition, increases of \$325,000 in Maintenance of Effort dollars, \$227,000 State Operation dollars and \$160,000 in Title V Local Aids funds contributed to this variance.

Year: 2010
Field Note:
This variance, an increase of \$3.12 million (20.9%), is due primarily to an increase of \$2.7 million in the amount of Program Income provided by local reproductive health projects and approximately \$359,000 in Maintenance of Effort dollars.

FORM 6

NUMBER AND PERCENTAGE OF NEWBORNS AND OTHERS SCREENED, CASES CONFIRMED, AND TREATED

Sect. 506(a)(2)(B)(iii)

STATE: WI

Total Births by Occurrence: 67,721

Reporting Year: 2011

Type of Screening Tests	(A) Receiving at least one Screen (1)		(B) No. of Presumptive Positive Screens	(C) No. Confirmed Cases (2)	(D) Needing Treatment that Received Treatment (3)

Screening Programs for Older Children & Women (Specify Tests by name)

- (1) Use occurrent births as denominator.
 (2) Report only those from resident births.
 (3) Use number of confirmed cases as denominator.

FORM NOTES FOR FORM 6

Occurent births: For CY 2011, according to the provisional data file, there were 67,721 births occurring in Wisconsin. Wisconsin Department of Health Services, Division of Public Health, Office of Health Informatics, 2011. The count of newborns screened for 2011 was 67,057 (99.0%) of the occurent births. 664 newborns were not screende. These infants were not screened for various reasons: some may have died, or parents may have refused screening for religious or cultural reasons. Data issues: NBS data files and birth certificates records are not linked. Provisional occurent births data indicate a small discrepancy between the numbers of babies born in Wisconsin and the numbers screened. NBS data includes resident and occurent births. Resident birth data for 2011 are not available for this report and wil not be availalbe until 2013.

Others	25,257	64.0	3.5	7.2	23.2	2.1
TOTAL	127,585					

FORM NOTES FOR FORM 7

Sources: 2011 Title V program data and Reproductive Health/Family Planning (RH/FP) data come from SPHERE (Secure Public Health Electronic Record Environment), the data collection system used by agencies receiving Title V funds, 2011 NBS data from the Wisconsin State Laboratory of Hygiene, and 2011 provisional occurrent birth data from the Wisconsin Department of Health Services, Division of Public Health, Office of Health Informatics. RH/FP data include persons receiving services supported with Title V (and matching) funds and do not include Title X.

Primary sources of health care coverage are required fields for local agencies that use SPHERE.

The data for primary sources of coverage for infants are: 1) estimates from the 2010 birth file; the 2011 birth file was not available for estimates of primary sources of coverage and NBS data do not have primary sources of coverage; and, 2) SPHERE data from 2011.

Data issues: There has been a steady decline in total number of individuals served since 2005. There are many factors that affect our total numbers of individuals served (unduplicated) under Title V; therefore, from year-to-year, there are random fluctuations. Two of these factors are: data collection by local agencies and change of staff and MCH template objectives that are negotiated with local health departments each year, thereby affecting the numbers served by each agency. RH/FP data from years prior to 2005 included individuals who received services in Title X family planning clinics whose care was partially supported with Title V matching funds. Prior to 2005, agencies supported with Title X family planning funds also received substantial Title V matching funds to support reproductive health care services. Following implementation of the Medicaid Family Planning Waiver, Title X agencies no longer received Title V matching funds. Therefore, individuals receiving services in these clinics did not have a portion of their care supported with Title V funds, and are not included in Form 7. Furthermore, based on the most recent Needs Assessment priorities, Title V funds began focusing on systems-building activities for communities that support early childhood health and development; therefore, the number of individuals served will most likely decline as community systems evolve and mature. Although the number of CSHCN served has fluctuated from year-to-year, there is a general decline for numbers served as programming has shifted from individual services to regional program collaborations.

FIELD LEVEL NOTES**1. Section Number:** Form7_Main

Field Name: PregWomen_TS

Row Name: Pregnant Women

Column Name: Title V Total Served

Year: 2013

Field Note:

Several of our major family planning providers, as part of their quality assurance/quality improvement in coding and documentation, determined that a positive pregnancy test result alone does not justify classifying a patient as pregnant—in the absence of further confirmation of pregnancy plans and confirmation of an on-going pregnancy. Previously, all patients with a positive pregnancy test – regardless of subsequent outcome and pathway of care – were coded and reported as pregnant. This change resulted in a decrease in the number of patients seen in family planning clinics reported as “pregnant” in their data reports. This is principal reason the decrease in pregnant women from 2009 to 2011.

2. Section Number: Form7_Main

Field Name: Children_0_1_TS

Row Name: Infants <1 year of age

Column Name: Title V Total Served

Year: 2013

Field Note:

Data issue: Total infants <1 year of age equals: 67,721 (the 2010

provisional occurrent birth count) which includes Title V = [(360 CSHCN infants) + (3,461 infants)]. The NBS file, birth records, and SPHERE (data collection system used by agencies receiving Title V funds) are not linked; therefore, the Title V infants are included in the total number of infants because it's likely those infants were screened. The percentage of primary source of coverage for Title V infants are: Title XIX – 6.6%, Title XXI – 38.7%, Private/Other – 22.3%, None – 3.1%, Unknown - 28.1%.

FORM 8
DELIVERIES AND INFANTS SERVED BY TITLE V AND ENTITLED TO BENEFITS UNDER TITLE XIX
(By RACE AND ETHNICITY)
[Sec. 506(a)(2)(C-D)]

INFANTS								
Total Infants in State	58,226	6,413	1	0	0	0	0	6,413
Title V Served	440	449	0	0	0	0	0	449
Eligible for Title XIX	22,686	4,707	1	0	0	0	0	4,707

FORM NOTES FOR FORM 8

Data issues: Reporting data for 2011 are not available for Total Deliveries and Eligible for Title XIX, and Total Infants and Eligible for Title XIX by race and by ethnicity. These data will not be available until late 2012 or 2013. Therefore, we report on the most recent data available for 2010, but indicate in the field Reporting Year, 2011, because we want to report on Title V infants served in Wisconsin during CY 2011.

Sources: Total deliveries and infants in state: 2010 resident births. Wisconsin Department of Health Services, Division of Public Health, Office of Health Informatics, 2012. The number of births that occurred to Wisconsin residents in 2010 was 68,367. The source identifying deliveries eligible for Title XIX is the newborns' hospital discharge records, as matched to birth records. The hospital birth records have the hospital's anticipated primary payer; not all births could be matched to the hospital records. The payer for these births was estimated by assuming the proportion of known Title XIX deliveries within each race and ethnic group was the same among the unknowns.

2011 data are not available from the Office of Health Informatics until late summer 2013 or early 2014.

Eligible for Title V: 2011 Title V program data SPHERE (Secure Public Health Electronic Record Environment).

Field Note:

The number of calls received on the State MCH Hbtline have declined steadily during the past few years; most likely this decline is due to technological changes and people accessing information on the internet.

FORM 10
TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2013
[Sec. 506(a)(1)]
STATE: WI

1. State MCH Administration:
(max 2500 characters)

The Title V MCH/CYSHCN Block Grant funds are administered by the WI Division of Public Health (DPH), Bureau of Community Health Promotion (BCHP), Family Health Section (FHS). The FHS is clearly demarcated within the Division as the designee for administration of the Title V activities. This clear demarcation serves as a critical component to ensure comprehensive program activity and a single point of accountability for the State. The FHS contains the MCH Unit which includes the MCH and CYSHCN Programs.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ <u>10,668,234</u>
3. Unobligated balance (Line 2, Form 2)	\$ <u>0</u>
4. State Funds (Line 3, Form 2)	\$ <u>9,657,814</u>
5. Local MCH Funds (Line 4, Form 2)	\$ <u>0</u>
6. Other Funds (Line 5, Form 2)	\$ <u>0</u>
7. Program Income (Line 6, Form 2)	\$ <u>9,375,410</u>
8. Total Federal-State Partnership (Line 8, Form 2)	\$ <u>29,691,458</u>

9. Most significant providers receiving MCH funds:

<u>Local Health Departments (LHD)</u>
<u>Tribal Agencies</u>
<u>Women's Health-Reproductive Health Care Providers</u>
<u>Statewide and Regional Nonprofit Agencies</u>

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	<u>4,557</u>
b. Infants < 1 year old	<u>67,721</u>
c. Children 1 to 22 years old	<u>27,882</u>
d. CSHCN	<u>2,168</u>
e. Others	<u>25,257</u>

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

WI's Title V funds are distributed to local agencies and organizations (including tribes) on an annual basis through DPH's performance-based contracting process. This process is non-competitive and helps agencies focus on improving health status and health outcomes for WI's citizens. LHDs have the first right of refusal to the formula allocated funds. Every fall, DPH initiates a three-way negotiation process with representatives from the LHDs, the DPH Regional Office, and the DPH/MCH Central Office. To make the MCH/CYSHCN negotiation process easier, LHDs select from a list of template objectives developed specifically by the MCH/CYSHCN Programs that align with WI's and National MCH/CYSHCN priority needs for the maternal and child health population. Template objectives are "pre-approved" activities and, as a result, streamline the negotiation process. In 2011, the MCH/CYSHCN Program offered 16 objectives down from the previous year's 25. This reduction was in preparation for the new 5 year focus based on the Program's required needs assessment and strategic planning. Objectives were removed from the list due to limited previous year selection or expanded capacity of programs, e.g. oral health and nutrition and physical activity. Unique objectives and templates selected in 2010 were considered if they built on progress made in the past year and included a sustainability plan. No new nontemplate objectives were accepted. Examples of the 2011 16 templates included measuring the outcomes of locally implemented: breastfeeding friendly initiatives, pregnant and postpartum women served by Medicaid PNCC, early childhood caries prevention services, implementing crib education programs to support safe sleep practices, strategies to support healthy birth outcomes and reduce racial and ethnic disparities, flu assessments to show reduction in home hazards previously identified, 0-7 year olds properly positioned in car safety seats, age appropriate developmental and social and emotional screenings, assessments, and referrals, strategies to support suicide prevention, CYSHCN care coordination, referral and follow up, and collaborative plan for a community system that supports early childhood health and development. In 2012 individual and direct services objectives are only being worked on in communities where no one else is providing that service to the most at risk MCH population; otherwise the focus is on the development of systems of early childhood services.

b. Population-Based Services:
(max 2500 characters)

Request for Proposals for statewide MCH/CYSHCN projects are released on a competitive basis approximately every 5 years based on the MCHB required needs assessment process. In the Spring of 2010 after the completion of the required MCHB Needs Assessment and identification of the Program priorities for the upcoming 5 years, the MCH/CYSHCN Program embarked on a new competitive process with statewide program initiatives and activities beginning 01/01/11 through 12/31/15. Beginning in 2011, local MCH activities supported early childhood systems approaches to have a greater impact on MCH priorities and outcomes identified by Title V as well as Healthiest WI 2020. 2011 was a transition year with 51 LHDs choosing to work on developing collaborative plans in partnership with key stakeholders for community systems that support early childhood health and development. This early childhood systems work includes 2 initiatives. Keeping Kids Alive (KKA) supported by CHAW, focuses on fetal, infant and child mortality review and moving recommendations to prevention. WI Healthiest Families Initiative (WHFI) supported by UW Extension focuses on systems of services for family supports, child development, mental health and safety and injury prevention. The statewide projects provide local agencies and partners support and technical assistance for these initiatives. Other statewide work includes the WI Genetics System and the WI Healthiest Woman Initiative. As well, a new 5 year funding cycle began for the 5 CYSHCN Regional Centers whose goal is to enhance the local capacity to serve children and youth with special health care needs and their families and to meet the six national performance measures. Other CYSHCN initiatives include Parent to Parent matching and 4 CYSHCN Hubs of Expertise supporting the local development of Medical Homes, Family Health Leadership, Access/Health Benefits Counseling and Youth Health Transition. In 2012 all 94 WI LHDs are using their MCH funds to support either or both of the system initiatives, WHFI and KKA.

c. Infrastructure Building Services:
(max 2500 characters)

Wisconsin's Title V dollars are at work to build systems including women's health, e.g. perinatal services that address not only tobacco cessation and reduction in alcohol abuse but healthy weight, birth spacing, and support of Medicaid's PNCC program at the local implementation level; early comprehensive childhood (including CYSHCN) services, e.g. newborn blood and hearing screening and follow up, supporting access to Medicaid's health check, oral health, asthma, parenting, healthy birth outcomes and safety and injury and violence prevention as well as support and enhancement of the regional centers, MCH Hotline (1-800-722-2295) including First Step for families who have children and youth with special health care needs.

12. The primary Title V Program contact person:

13. The children with special health care needs (CSHCN) contact person:

FORM 11
TRACKING PERFORMANCE MEASURES
[SECS 485 (2)(2)(B)(iii) AND 486 (a)(2)(A)(iii)]
STATE: WI

Form Level Notes for Form 11

Form 11 has columns for 2007 – 2011. After the data and accompanying note are entered into the performance measure's table, they are imported into the application's narrative (IV. C, IV. D). 2011 data were required; if 2011 data were not available, 2010 provisional data were entered with an accompanying note. National Performance Measures: data for these measures are from several sources, including national and state surveys, and data systems maintained by the State of Wisconsin. Data for measures #1 and 12 are CY 2012. Data for measures #2, 3, 4, 5, and 6 are from the National Center for Health Statistics (NCHS) State and Local Area Integrated Telephone Survey (SLAITS) CSHCN module. Data for measures #8, 10, 13, 15, 16, 17, and 18 are for CY 2009 from the Wisconsin Department of Health Services, Office of Health Informatics; these data are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2011 data will not be available until mid-2012. Data for measure #7 are for June 2010 - June 2011 from the CDC's National Immunization Survey. Data for measure #9 were collected during the 2008-09 school year. Data for measure #14 are for CY 2010 from the CDC's Pediatric Nutrition Surveillance System; more recent data are not available. Negotiated State Performance Measures: Data for these measures are from several sources, including state data systems, state reports, and national surveys. Data for measure #1 are from the Family Planning Program for CY 2011, data for #2 and 6 are the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention. Data for #3 and 4 are from Wisconsin PRAMS and are weighted data representative of Wisconsin's birth population in 2009 and 2010; more recent data are not available because of the time lag for data collection, and weighted release of data. Data for #5 is from a state report; CY 2011 data are not available until 2012, 2010 data were used for the required 2011 indicator and are marked "provisional."

PERFORMANCE MEASURE # 01

The percent of screen positive newborns who received timely follow up to definitive diagnosis and clinical management for condition(s) mandated by their State-sponsored newborn screening programs.

Field Name: PM07

Row Name:

Column Name:

Year: 2011

Field Note:

Source: CDC National Immunization Survey, June 2010 - 2011. Coverage for the 43133 series with any 3+ Hib is 86.6% (SE 2.4).

2. **Section Number:** Form11_Performance Measure #7

Field Name: PM07

Row Name:

Column Name:

Year: 2010

Field Note:

The source of these data is the National Immunization Survey of a random sample of Wisconsin children who were born between January 2005 and June 2007. We have used the NIS consistently as our source to monitor this indicator. The Wisconsin Immunization Registry is a statewide registry for tracking immunizations for adults and children, however its use is not yet statewide by all providers, therefore, it does not provide a representative sample needed to track and report this measure over time. It is however, for now, a very useful tool for individual clinical practice and immunization administration for those who use it regularly.

3. **Section Number:** Form11_Performance Measure #7

Field Name: PM07

Row Name:

Column Name:

Year: 2009

Field Note:

The source of these data is the National Immunization Survey of a random sample of Wisconsin children who were born between January 2005 and June 2007.

Year: 2011
Field Note:
 Data issue: Data for 2011 will not be available from the Office of Health Informatics until 2013; therefore, the indicator for 2010 (1.5) and 2010 (1.5) are the data that we used for subsequent years' objectives.
- Section Number:** Form11_Performance Measure #10
Field Name: PM10
Row Name:
Column Name:
Year: 2010
Field Note:
 Source: Wisconsin Department of Health Services, Division of Public Health, Office of Health Informatics. Wisconsin Interactive Statistics on Health (WISH), <http://dhfs.wisconsin.gov/wish/>, Injury Mortality Module, accessed 03/05/2012.
 Although in 2010, Wisconsin's rate of death for children <14 years caused by motor vehicle was less than in previous years, we do not necessarily see a trend because the number of children who die per year in motor vehicle crashes is relatively small, and the rate may be adversely affected by only a slight increase or decrease in the number of events. Therefore, we have set our objectives to the best of our ability.

Field Level Notes

1. Section Number: Form11_Performance Measure #12

Field Name: PM12

Row Name:

Column Name:

Year: 2011

Field Note:

Data issue: If infants die or refuse a hearing screening, that is noted on the blood card. Therefore, the denominator in NPM 12 was adjusted to remove cases of refusal and expiration. Wisconsin Sound Beginnings, the State of Wisconsin's Early Hearing Detection and Intervention (EHDI) program maintains an electronic database called the Wisconsin EHDI Tracking, Referral and Coordination (WE-TRAC) system.

Hearing screening results are reported on the Wisconsin State Lab of Hygiene (WSLH) blood screening card. Birth hospitals perform a heel stick and a hearing test, record the results, and send the card to the WSLH. Data are entered from the blood screening card into the WSLH database. Hearing specific information is then messaged from the WSLH database to WE-TRAC. Processing logic and business rules dictate how records are handled. Records with PASS/PASS results are archived and records with a REFER (did not pass) or MISSING results are placed on a birth hospital or out of hospital provider queue for follow-up.

In May 2010, Wisconsin Act 279 was enacted. The bill requires the physician, nurse-midwife or certified professional midwife who attended the birth to ensure that the infant is screened and that parents are advised of the results. This passage of the legislation was especially important, because Wisconsin has a high out-of-hospital birth population. The EHDI program has a longstanding working relationship with Wisconsin Guild of Midwives. The organization has a number of screeners that are shared between practices. Most screenings typically occur at the 1 week visit, which are not counted in the prior to hospital discharge data.

2. Section Number: Form11_Performance Measure #12

Field Name: PM12

Row Name:

Column Name:

Year: 2010

Field Note:

Data issue: *If infants expire or refuse a hearing screening, it can be denoted on the blood card. For this reason, the denominator in NPM 12 has been adjusted to remove cases of refusal (227 cases) and expiration (104).

Wisconsin Sound Beginnings, the State of Wisconsin's early hearing detection and intervention (EHDI) program maintains an electronic database called the Wisconsin EHDI Tracking, Referral and Coordination (WE-TRAC) system.

Hearing screening results are reported on the Wisconsin State Lab of Hygiene (WSLH) blood screening card. Birth hospitals perform a heel stick and a hearing test, record the results, and send the card to the WSLH. Data are entered from the blood screening card into the WSLH database. Hearing specific information is then messaged from the WSLH database to WE-TRAC. Processing logic and business rules dictate how records are handled. Records with PASS/PASS results are archived and records with a REFER (did not pass) or MISSING results are placed on a birth hospital or out of hospital provider queue for follow-up.

In May 2010, Wisconsin Act 279 was enacted. The bill requires the physician, nurse-midwife or certified professional midwife who attended the birth to ensure that the infant is screened and that parents are advised of the results. This passage of the legislation was especially important, because Wisconsin has a high out of hospital birth population. The EHDI program has a longstanding working relationship with Wisconsin Guild of Midwives. The organization has a number of screeners that are shared between practices. Most screenings typically occur at the 1 week visit, which aren't counted in the prior to hospital discharge data. In 2010, 64,862 (96.9% of occurrent births) passed their screening by 1 month of age.

3. Section Number: Form11_Performance Measure #12

Field Name: PM12

Row Name:

Column Name:

Year: 2009

Field Note:

Hearing screening results are reported on the Wisconsin State Lab of Hygiene (WSLH) newborn blood screening card. Data are entered into the WSLH database and messaged to the Wisconsin Early Hearing Detection and Intervention Tracking Referral and Coordination (WE-TRAC) system. Processing logic within WE-TRAC filters incoming records and hearing screening results. Records with PASS/PASS results are archived and records for infants with REFER or missing results are placed on a birth hospital queue for follow-up. Hospitals continue to submit delayed hearing screening results via fax to the WSLH.

Wisconsin State Senate Bill 323 was passed during the 2009 legislative session. The bill requires the physician, nurse-midwife, or certified professional midwife who attends a birth to ensure that the infant is screened and that parents are advised of the results. Wisconsin Sound Beginnings, the State of Wisconsin's early hearing detection and intervention (EHDI) program, collaborated with others on the revisions of the bill to include support for follow up services. This bill was signed into law in May 2010.

PERFORMANCE MEASURE # 13

Percent of children without health insurance.

Data issues: 1) Estimated numbers have been rounded to the nearest 1,000. The annual Wisconsin Family Health Survey is a random digit dial telephone survey that collects and reports information about health status, problems, insurance coverage, and use of health care services among Wisconsin residents. The survey has questions about health-related limitations and chronic conditions for persons greater than age seventeen.

The indicator 1.7% for 2010 is most likely a result of the expansion of Medicaid programs for children during the past two years, and we do not think it represents a trend given new program cuts. However, we will monitor this indicator closely. The subsequent year's objectives have been set with consideration of the forecast of program cuts for the next few years.

 Data issue. Although there was an increase in 2009 to 41 deaths and in 2010 to 42 deaths by suicide from 27 deaths in 2009, we do not see a trend in an increased number of youth suicides. We will monitor this indicator closely for subsequent years, and since this rate may be adversely affected by a slight decrease or increase in the number of events, we have set out objectives based on our program expertise.

FORM 11
TRACKING PERFORMANCE MEASURES
[SECS 485 (2)(2)(B)(iii) AND 486 (a)(2)(A)(iii)]
STATE: WI

Form Level Notes for Form 11

Form 11 has columns for 2007 – 2011. After the data and accompanying note are entered into the performance measure's table, they are imported into the application's narrative (IV. C, IV. D). 2011 data were required; if 2011 data were not available, 2010 provisional data were entered with an accompanying note. National Performance Measures: data for these measures are from several sources, including national and state surveys, and data systems maintained by the State of Wisconsin. Data for measures #1 and 12 are CY 2012. Data for measures #2, 3, 4, 5, and 6 are from the National Center for Health Statistics (NCHS) State and Local Area Integrated Telephone Survey (SLAITS) CSHCN module. Data for measures #8, 10, 13, 15, 16, 17, and 18 are for CY 2009 from the Wisconsin Department of Health Services, Office of Health Informatics; these data are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2011 data will not be available until mid-2012. Data for measure #7 are for June 2010 - June 2011 from the CDC's National Immunization Survey. Data for measure #9 were collected during the 2008-09 school year. Data for measure #14 are for CY 2010 from the CDC's Pediatric Nutrition Surveillance System; more recent data are not available. Negotiated State Performance Measures: Data for these measures are from several sources, including state data systems, state reports, and national surveys. Data for measure #1 are from the Family Planning Program for CY 2011, data for #2 and 6 are the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention. Data for #3 and 4 are from Wisconsin PRAMS and are weighted data representative of Wisconsin's birth population in 2009 and 2010; more recent data are not available because of the time lag for data collection, and weighted release of data. Data for #5 is from a state report; CY 2011 data are not available until 2012, 2010 data were used for the required 2011 indicator and are marked "provisional."

STATE PERFORMANCE MEASURE # 1 - REPORTING YEAR

Percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver during the year.

Field Note:

Objectives are held at level at 25% for 2011-2015. Wisconsin has proposed to eliminate GPR-Family Planning funding in 2011, which supports the statewide system of community based family planning services, through which over 75% of Medicaid family planning services are provided. Accurate projections are impossible due to uncertainty of impact. Statewide access is likely to decrease.

2. Section Number: Form11_State Performance Measure #1

Field Name: SM1

Row Name:

Column Name:

Year: 2009

Field Note:

The federal Deficit Reduction Act (DRA) implemented several provisions that resulted in decreased enrollment in all Medicaid programs, including the Family Planning Waiver; we have revised objectives accordingly.

STATE PERFORMANCE MEASURE # 2 - REPORTING YEAR

Percent of children who receive coordinated, ongoing comprehensive care within a medical home.

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE WI FY: 2013

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce health disparities for women, infants, and children, including those with special health care needs.
2. Increase the number of women, children, and families who receive preventive and treatment health services within a medical home.
3. Increase the number of children and youth with special health care needs and their families who access necessary services and supports.
4. Increase the number of women, men, and families who have knowledge of and skills to promote optimal infant and child health, development, and growth.
5. Increase the number of women, children, and families who have optimal mental health and healthy relationships.
6. Increase the number of women, men, and families who have knowledge of and skills to promote optimal reproductive health and pregnancy planning.
7. Increase the number of women, children, and families who receive preventive screenings, early identification, and intervention.
8. Increase the number of women, children, and families who live in a safe and healthy community.
- 9.

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: WI

SP() # _____ 1

PERFORMANCE MEASURE:	Percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver during the year.
STATUS:	Active
GOAL:	Increase the percent of income eligible reproductive-age women in Wisconsin who are enrolled in the Wisconsin Medicaid Family Planning Waiver.
DEFINITION:	<p>The percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver.</p> <p>Numerator: Number of women enrolled in the Family Planning Waiver</p> <p>Denominator: Number of women, ages 15-44, estimated to be Medicaid income eligible minus those who have existing Medicaid/BadgerCare coverage.</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2020 OBJECTIVE:	<p>9.3</p> <p>Increase the proportion of females at risk of unintended pregnancy (and their partners) who use contraception.</p>
DATA SOURCES AND DATA ISSUES:	Enrollment data from Wisconsin Department of Health Services, Division of Health Care Access and Accountability, Medicaid program data.
SIGNIFICANCE:	Access to affordable and quality contraceptive and related reproductive health services is necessary for increased use of contraception among sexually active women and couples at risk of unintended pregnancy.

SP() # 2

PERFORMANCE MEASURE:

Percent of children who receive coordinated, ongoing comprehensive care within a medical home.

STATUS:

Active

GOAL

To increase the percentage of Wisconsin children who have a medical home.

DEFINITION

The American Academy of Pediatrics describes care from a medical home as accessible, continuous, coordinated, family-centered, comprehensive, compassionate and culturally-competent.

Numerator:

Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.

Denominator:

Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE

1-4. Access to quality health services.
Increase the proportion of persons who have a specific source of ongoing care.

DATA SOURCES AND DATA ISSUES

National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.

SIGNIFICANCE

A medical home is an approach to providing continuous and comprehensive primary care in a high-quality and cost-effective manner.

SP() # _____ 3

PERFORMANCE MEASURE:

Percent of Black, non-Hispanic women who have had a live birth who report symptoms of depression after pregnancy.

STATUS:

Active

GOAL

Reduce the number of non-Hispanic Black women who experience postpartum depression at a higher rate than non-Hispanic white women.

DEFINITION

The percent of non-Hispanic Black women who report symptoms of depression after pregnancy.

Numerator:

Weighted number of Black, non-Hispanic women who had a live birth who reported that they always or often felt down, depressed or hopeless since their new baby was born on the Wisconsin Pregnancy Risk Assessment Monitoring System (PRAMS).

Denominator:

Weighted number of Black, non-Hispanic women represented in the Wisconsin Pregnancy Risk Assessment Monitoring System within the past year.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE

No specific HP2010 Objective for postpartum depression.

DATA SOURCES AND DATA ISSUES

Wisconsin PRAMS is a state-based survey that can be generalized to Wisconsin resident women who delivered a live born infant during the calendar year. These data have been weighted according to the uniform procedure established by the Centers for Disease Control for all states and territories participating in PRAMS. For Wisconsin, this is particularly important because the non-Hispanic Black population was intentionally oversampled to assure these responses will be given weight equal to their actual proportional representation in the population.

SIGNIFICANCE

Perinatal mood disorders are potentially devastating conditions that affect women during pregnancy and after childbirth. Postpartum depression is a perinatal mood disorder under-diagnosed and under-treated. Early identification, evaluation and treatment of postpartum depression is needed to enhance the well being of women, their infants and families. It is estimated that 8 to 15% of Wisconsin women suffer from clinically significant postpartum depression; this number increases to 28% for women living in poverty. African American women in Wisconsin are disproportionately affected by postpartum depression.

SP() # _____ 4

PERFORMANCE MEASURE:

Percent of women who have had a live birth who report having an unintended or unwanted pregnancy.

STATUS:

Active

GOAL

To reduce unintended and unwanted pregnancies.

DEFINITION

The percent of women who report having an unintended or unwanted pregnancy during the reporting year.

Numerator:

Weighted number of women who delivered a live birth who reported that they had wanted to get pregnant later, hadn't wanted to get pregnant then or in the near future, or weren't sure what they wanted on the annual Wisconsin Pregnancy Risk Assessment Monitoring System (PRAMS).

Denominator:

Weighted number of women who had a live birth represented in the Wisconsin Pregnancy Risk Assessment Monitoring System within the past year.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE

Objective 9-1: Increase the proportion of pregnancies that are intended.

DATA SOURCES AND DATA ISSUES

Wisconsin PRAMS is a state-based survey that can be generalized to Wisconsin resident women who delivered a live born infant during the calendar year. These data have been weighted according to the uniform procedure established by the Centers for Disease Control for all states and territories participating in PRAMS. For Wisconsin, this is particularly important because the non-Hispanic Black population was intentionally oversampled to assure these responses will be given weight equal to their actual proportional representation in the population.

SIGNIFICANCE

Pregnancies which are unintended and/or are unplanned result in poorer health outcomes, higher occurrence of perinatal/postpartum depressions, higher number of abortions, increased child maltreatment and other negative outcomes for pregnant women, infants and children.

SP() # 5

PERFORMANCE MEASURE:

Rate per 1,000 of substantiated reports of child maltreatment to Wisconsin children, ages 0 - 17, during the year.

STATUS:

Active

GOAL

To decrease the number of children, ages 0-17, being maltreated in Wisconsin during the reporting year.

DEFINITION

The number of substantiated reports of child maltreatment to Wisconsin children, ages 0-17, during the calendar year.

Numerator:

The number of child abuse and neglect reports and substantiations in a given calendar year.

Denominator:

The number of children under age 18.

Units: 1000 **Text:** Rate

HEALTHY PEOPLE 2020 OBJECTIVE

15-33

Reduce maltreatment and maltreatment fatalities of children.

15-34

Reduce the rate of physical assault by current or former intimate partners (for persons 12 and older).

DATA SOURCES AND DATA ISSUES

Annual Report to the Governor and Legislature on Wisconsin Child Abuse and Neglect, Bureau of Program Integrity, Division of Safety and Permanence, Department of Children and Families.

SIGNIFICANCE

Child maltreatment has physical, psychological, behavioral and societal consequences that can lead into long-term physical and mental health problems and economic consequences.

SP() # _____ 6

PERFORMANCE MEASURE:

Percent of children age 10 months to 5 years who received a standardized screening for developmental or behavioral problems.

STATUS:

Active

GOAL

To improve early detection of delays in children and improve child health and well-being for identified children.

DEFINITION

Percent of children age 10 months to 5 years who received a standardized screening for developmental or behavioral problems.

Numerator:

Weighted number of children who report receipt of a standardized screening on the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.

Denominator:

Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE

HP 2010 Objective: There are no objectives or related objectives defined in HP2010

DATA SOURCES AND DATA ISSUES

National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention. In 2007, only 25.9% of Wisconsin children were reported to have received a standardized screening for developmental or behavioral problems.

SIGNIFICANCE

Many children with behavioral or developmental disabilities are missing vital opportunities for early detection and intervention. The American Academy of Pediatrics (AAP) and the American Academy of Neurology recommend that all infants and young children be screened for developmental delays periodically in the context of office-based primary care.

SP() # 7

PERFORMANCE MEASURE:

Percent of children under 1 year of age enrolled in Wisconsin's Birth to 3 Program during the calendar year.

STATUS:

Active

GOAL

To improve receipt of early intervention services and improve child health and well-being for children with developmental delays.

DEFINITION

Number of infants and toddlers birth to age 1 with an Individualized Family Service Plans (IFSPs).

Numerator:

Number of infants and toddlers birth to age 1 with an Individual Family Service Plans (IFSPs) during the calendar year.

Denominator:

Number of infants and toddlers birth to age 1 in Wisconsin during the calendar year.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2020 OBJECTIVE

There are no objectives or related objectives defined in HP2010.

DATA SOURCES AND DATA ISSUES

Wisconsin Department of Health Services, Bureau of Long Term Care, Birth to 3 Program.

SIGNIFICANCE

Research has shown that for children with or at-risk for developmental delay, the earlier that intervention can be provided, the greater chance for the child's improved outcomes. By providing early intervention services to the child and family at the earliest possible time, potential later costs to society can be reduced. Wisconsin continues to fall below the expected target recommended by the Office of Special Education (OSEP) of 1.15%.

HEALTH SYSTEMS CAPACITY #08

The percent of State SSI beneficiaries less than 16 years old receiving rehabilitative services from the State Children with Special Health Care Needs (CSHCN) Program.

Annual Indicator	Annual Indicator Data				
	2007	2008	2009	2010	2011
Annual Indicator	100.0	100.0	100.0	100.0	100.0
Numerator	15,289	15,793	16,929	17,794	18,499
Denominator	15,289	15,793	16,929	17,794	18,499

Check this box if you cannot report the numerator because

1. There are fewer than 5 events over the last year, and
2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.
(Explain data in a year note. See Guidance, Appendix IX.)

Field Level Notes

1. Section Number: Form17_Health Systems Capacity Indicator #08

Field Name: HSC08

Row Name:

Column Name:

Year: 2011

Field Note:

As of December 2011, 18,499 children under the age of 16 received SSI benefits and are automatically eligible for the Wisconsin Medicaid Program. The CYSHCN Program provided information and resource materials to 2,764 families who made application to SSI through a formal MOU agreement with the Wisconsin Social Security Administration Office. Direct services were provided to 173 SSI recipients less than 16 years of age through MCH programs and the CYSHCN Regional Centers.

Data issues: The denominator, 18,499 is provided by the Social Security Administration (SSA) through an agreement between SSA and the Child and Adolescent Health Initiative (CAHMI) at www.cahmi.org. The numerator is the same as all SSA recipients in Wisconsin are automatically eligible for the Wisconsin Medicaid program of which provides comprehensive therapy and rehabilitative services. This indicator is consistent with other states with universal Medicaid coverage for these services. Title V's role is focused on assuring families are aware of and enrolled in SSI and then in obtaining Medicaid benefits and services as applicable. As such, under an MOU agreement, the Wisconsin Disability Determination Bureau of SSA electronically provides the State CYSHCN Program names and addresses of children under age 16 who have made application for SSI benefits. In 2011, 2,764 families were sent information from the Wisconsin CYSHCN Program about the CYSHCN Regional Centers, Family Voices, Birth to 3 and other disability resources, whether or not the child was found eligible for SSI.

2. Section Number: Form17_Health Systems Capacity Indicator #08

Field Name: HSC08

Row Name:

Column Name:

Year: 2010

Field Note:

As of December 2010, 17,794 children under the age of 16 received SSI benefits and are automatically eligible for the Wisconsin Medicaid Program. The CYSHCN Program provided information and resource materials to 2,324 families who made application to SSI through a formal MOU agreement with the Wisconsin Social Security Administration Office. Direct services were provided to 251 SSI recipients less than 16 years of age through MCH programs and the CYSHCN Regional Centers.

Data issues: The denominator, 17,794 is provided by the Social Security Administration (SSA) through an agreement between SSA and the Child and Adolescent Health Initiative (CAHMI) at www.cahmi.org. The numerator is the same as all SSA recipients in Wisconsin are automatically eligible for the Wisconsin Medicaid program of which provides comprehensive therapy and rehabilitative services. This indicator is consistent with other states with universal Medicaid coverage for these services. Title V's role is focused on assuring families are aware of and enrolled in SSI and then in obtaining Medicaid benefits and services as applicable. As such, under an MOU agreement, the Wisconsin Disability Determination Bureau of SSA electronically provides the State CYSHCN Program names and addresses of children under age 16 who have made application for SSI benefits. In 2010, 2,324 families were sent information from the Wisconsin CYSHCN Program about the CYSHCN Regional Centers, Family Voices, Birth to 3 and other disability resources, whether or not the child was found eligible for SSI.

3. Section Number: Form17_Health Systems Capacity Indicator #08

Field Name: HSC08

Row Name:

Column Name:

Year: 2009

Field Note:

As of December 2009, 16,929 children under the age of 16 received SSI benefits and are automatically eligible for the Wisconsin Medicaid Program. The CYSHCN Program provided information and resource materials to 2,541 families who made application to SSI. Direct services were provided through MCH programs and the CYSHCN Regional Centers to 269 clients less than 16 years of age on SSI.

Data issues: The denominator, 16,929 is provided by the Social Security Administration through an informal agreement between SSA and Healthy and Ready to Work (HRTW) and can be found at <http://www.hrtw.org/youth/data.html> SSI Stats. The numerator is the same as all SSA recipients are automatically eligible for the Wisconsin Medicaid program. All SSI beneficiaries less than 16 years old are automatically eligible for Wisconsin Medicaid Program which provides comprehensive rehabilitative services. This indicator is consistent with other states with universal Medicaid coverage for these services. Title V's role is focused on assuring families are aware of and enrolled in SSI. As such, under an MOU agreement, the Wisconsin Disability Determination Bureau of SSA electronically provides the CYSHCN program names and addresses of children under age 16 who have made application for SSI benefits.  (MEDICAID AND NON-MEDICAID COMPARISON)
 STATE: WI

INDICATOR #05 <i>Comparison of health system capacity indicators for Medicaid, non-Medicaid, and all MCH populations in the State</i>	YEAR	DATA SOURCE	POPULATION		
			MEDICAID	NON-MEDICAID	ALL
a) <i>Percent of low birth weight (< 2,500 grams)</i>	2010	Matching data files	8.4	5.8	6.9
b) <i>Infant deaths per 1,000 live births</i>	2010	Matching data files	6.4	4.1	5
c) <i>Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester</i>	2010	Matching data files	76.7	91.3	85.1
d) <i>Percent of pregnant women with adequate prenatal care (observed to expected prenatal visits is greater than or equal to 80% [Kotelchuck Index])</i>	2010	Matching data files	79.4	91.7	86.5

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #06(MEDICAID ELIGIBILITY LEVEL)
 STATE: WI

INDICATOR #06 <i>The percent of poverty level for eligibility in the State's Medicaid programs for infants (0 to 1), children, Medicaid and pregnant women.</i>	YEAR	PERCENT OF POVERTY LEVEL MEDICAID (Valid range: 100-300 percent)
a) <i>Infants (0 to 1)</i>	2011	_____300_____
b) <i>Medicaid Children</i> (Age range _____1 to _____18) (Age range _____ to _____) (Age range _____ to _____)	2011	_____300_____ _____ _____
c) <i>Pregnant Women</i>	2011	_____300_____

FORM 18
HEALTH SYSTEMS CAPACITY INDICATOR #06(SCHIP ELIGIBILITY LEVEL)
 STATE: WI

INDICATOR #06 <i>The percent of poverty level for eligibility in the State's SCHIP programs for infants (0 to 1), children, SCHIP and pregnant women.</i>	YEAR	PERCENT OF POVERTY LEVEL SCHIP
a) <i>Infants (0 to 1)</i>	2011	<u> 250 </u>
b) <i>Medicaid Children</i> (Age range <u> 1 </u> to <u> 18 </u>) (Age range <u> </u> to <u> </u>) (Age range <u> </u> to <u> </u>)	2011	<u> 250 </u> <u> </u> <u> </u>
c) <i>Pregnant Women</i>	2011	<u> 250 </u>

FORM NOTES FOR FORM 18

In 2010, there were 68,367 live births to Wisconsin residents. Of these, 64,640 (94.5%) were resident births with a birth-to-hospital record match. These linked records include only Wisconsin residents born in a Wisconsin hospital. The total is less than the total resident births, since it does not include out-of-state occurrence births and births outside hospitals.

FIELD LEVEL NOTES

1. Section Number: Form18_Indicator 05

Field Name: LowBirthWeight

Row Name: Percent of low birth weight (<2,500 grams)

Column Name:

Year: 2013

Field Note:

In 2010, there were 68,367 live births to Wisconsin residents. Of these, 64,640 (94.5%) were resident births with a birth-to-hospital record match. These linked records include only Wisconsin residents born in a Wisconsin hospital. Therefore, the total overall percent of low birthweight infants (6.9%) is slightly different from the total overall percent of low birthweight infants to Wisconsin residents (7.0%).

2. Section Number: Form18_Indicator 05

Field Name: InfantDeath

Row Name: Infant deaths per 1,000 live births

Column Name:

Year: 2013

Field Note:

In 2010, there were 68,367 live births to Wisconsin residents. Of these, 64,640 (94.5%) were resident births with a birth-to-hospital record match. These linked records include only Wisconsin residents born in a Wisconsin hospital. Therefore, the total infant mortality rates (6.9) is slightly different from the total overall infant mortality rate to Wisconsin residents (5.7).

3. Section Number: Form18_Indicator 05

Field Name: CareFirstTrimester

Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester

Column Name:

Year: 2013

Field Note:

In 2010, there were 68,367 live births to Wisconsin residents. Of these, 64,640 (94.5%) were resident births with a birth-to-hospital record match. These linked records include only Wisconsin residents born in a Wisconsin hospital. Therefore, the total percent of infants born to pregnant women receiving prenatal care beginning in the first trimester (85.1%) is slightly different from the total percentage to Wisconsin residents (84.4%).

4. Section Number: Form18_Indicator 05

Field Name: AdequateCare

Row Name: Percent of pregnant women with adequate prenatal care

Column Name:

Year: 2013

Field Note:

In 2010, there were 68,367 live births to Wisconsin residents. Of these, 64,640 (94.5%) were resident births with a birth-to-hospital record match. These linked records include only Wisconsin residents born in a Wisconsin hospital. Therefore, the total percent of infant born to pregnant women receiving prenatal care beginning in the first trimester (86.5%) is slightly different from the total percentage to Wisconsin residents (85.4%).

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
 STATE: WI

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	Yes
Annual linkage of birth certificates and WIC eligibility files	3	Yes
Annual linkage of birth certificates and newborn screening files	3	Yes
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	3	Yes
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

*Where:
 1 = No, the MCH agency does not have this ability.
 2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
 3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
 STATE: WI

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	No
Other: <u>Wisconsin Youth Tobacco Survey</u>	3	Yes

*Where:
 1 = No
 2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
 3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Notes:
 1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

FORM NOTES FOR FORM 19

None

FIELD LEVEL NOTES

1. **Section Number:** Form19_Indicator 09A

Field Name: RecentMother

Row Name: Survey of recent mothers at least every two years (like PRAMS)

Column Name:

Year: 2013

Field Note:

Wisconsin was awarded PRAMS in 2006 and completed its five-year cycle of funding in April 2011. Wisconsin was awarded another cycle of five year funding for May 2011 - April 2016. Wisconsin PRAMS is a collaborative project between the Office of Health Informatics and the Bureau of Community Health Promotion (which administers Title V, Division of Public Health).

2. **Section Number:** Form19_Indicator 09B

Field Name: Other1_09B

Row Name: Other

Column Name:

Year: 2013

Field Note:

The Wisconsin Youth Tobacco Survey is a comprehensive measure of youth awareness, attitudes, and related behaviors about tobacco in Wisconsin. The survey is conducted in both public middle and high schools during the spring semester of even years (2008, 2010). The next survey will be conducted in 2012.

FORM 20
HEALTH STATUS INDICATORS #01-#05
MULTI-YEAR DATA
STATE: WI

Form Level Notes for Form 20

None

HEALTH STATUS INDICATOR #01A

The percent of live births weighing less than 2,500 grams.

	<u>Annual Indicator Data</u>				
	2007	2008	2009	2010	2011
Annual Indicator	7.0	7.0	7.1	7.0	7.0

Check this box if you cannot report the numerator because

1. There are fewer than 5 events over the last year, and
2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.
(Explain data in a year note. See Guidance, Appendix IX.)

FORM NOTES FOR FORM 21

Data for Form 21 are from several sources, including the US Census, Wisconsin government agencies (Departments of Health Services, Public Instruction, and Office of Justice Assistance).

HSI#06A: US Census.

HSI#07A: 2010 data. In Wisconsin, all live births were classified by race or Hispanic origin of mother into one of six categories: non-Hispanic white, non-Hispanic black/African American, non-Hispanic American Indian, Hispanic/Latino, non-Hispanic Laotian/Hmong, and non-Hispanic other (which are mostly Asian). Wisconsin Department of Health Services, Division of Public Health, Office of Health Informatics.

HSI#08A: 2010 data. Wisconsin Department of Health Services, Division of Public Health, Office of Health Informatics.

HSI#09A: The form has a checkbox for whether the data are provisional or final; the data for this form are both provisional and final - depending on the indicator; to clear the form, we checked "provisional". The data for this form come from several sources. Classification of data indicators as required by race/ethnicity are difficult because the race/ethnic classifications are not standardized across agencies.

HSI#10: US Census

HSI#11: US Census

HSI#12: US Census

FIELD LEVEL NOTES

1. **Section Number:** Form21_Indicator 07A
Field Name: Race_Women35
Row Name: Women 35 or older
